

## PROJECT 2

### COMPUTER INVENTORY DATABASE

Computers are US (CUS) is in need for us to develop an inventory system that will keep track of computer devices. The devices are assigned to a department and the devices may have multiple software titles loaded on the device. For example, computers will have multiple software titles, while printers have no software loaded. It would be beneficial if the devices were assigned to a category, such as PC, Printers, etc... CUS wants the following documentation:

Object Diagram  
Entity-Relationship Diagram (ER diagram)  
Shorthand Notation

#### Deliverables:

Complete the Object Diagram  
Complete the ER diagram  
Complete the Shorthand Notation  
Create the database and establish the relationship  
Create a relationship report
