

MCIT Organizational Chart

An organization diagram is a visual way to depict how the business is set up. In this business, the Vice Presidents (VP) listed below report directly to the Chief Executive Officer (CEO).

There are many different ways that organizations are established, but under each VP, there are typically a program manager and other professionals report to the program manager. For instance, under VP of Software Development, the Software Engineer heads up a team of System Analysts and Programmers.

Below are listings of such professionals for various VPs.

Information Support Services

Examples: Business Intelligence Analysts, Business Continuity Analysts, Call Center Specialists, Customer Service Representatives, Data Analysts, Data Modelers, Database Administrators, etc.

Network Systems

Examples: Network Architects, Network and PC Support Technicians, Network Administrators, Systems Administrators, Network Security Analysts, Telecommunications Technicians, etc.

Programming and Software Development

Examples: Programmers, IT Project Managers, Software Architects, Quality Assurance, etc.

Web and Digital Communications

Examples: Artists, Digital Media Designers, Video Game Designers, Web Designers, etc.
